Manufacturer Disclosure Statement for Medical Device Security – MDS²

Device Category †: 16512	Manufacturer: Carestream Health Inc.	Document ID: 7H8812	Document Release Date: 11/10/2008
Device Model: DRX-1 Detector System	Software Revision: 1 and later	Software Release Date: November, 2008	

Manufacturer or Representative Contact Information:	Name: Technical Support	Title: N/A	Department: US&C Service
	Company Name: Carestream Health Inc.	Telephone #: 1-800-328-2910	e-mail: health.imaging.tsc@carestreamhealth.com

MANAGEMENT OF ELECTRONIC PROTECTED HEALTH INFORMATION (ePHI) *As defined by HIPAA Security Rule, 45 CFR Part 164)*	Yes No N/A	Note #
1. Can this device transmit or maintain *electronic Protected Health Information* (ePHI)?‡	Yes __	_____
2. Types of ePHI data elements that can be maintained by the device:		
a. __Demographic (e.g., name, address, location, unique identification number)?	Yes __	_____
b. _Medical record (e.g., medical record #, account #, test or treatment date, device identification number)?	Yes __	_____
c. __Diagnostic/therapeutic (e.g., photo/radiograph, test results, or physiologic data with identifying characteristics)?.	Yes __	_____
d. _Open, unstructured text entered by device user/operator?	Yes __	_____
3. Maintaining ePHI: *Can the device*		
a. __Maintain ePHI temporarily in volatile memory (i.e., until cleared on by power-off or reset)?	Yes __	_____
b. Store ePHI persistently on local media?	Yes __	_____
c. Import/export ePHI with other systems?	Yes __	_____
4. Mechanisms used for the transmitting, importing/exporting of ePHI: *Can the device*		
a. Display ePHI (e.g., video display)?	Yes __	_____
b. Generate hardcopy reports or images containing ePHI?	Yes __	_____
c. Retrieve ePHI from or record ePHI to removable media (e.g., disk, DVD, CD-ROM, tape, CF/SD card, memory stick)?.	Yes __	_____
d. Transmit/receive or import/export ePHI via dedicated cable connection (e.g., IEEE 1073, serial port, USB, FireWire)?	No ___	_____
e. Transmit/receive ePHI via a network connection (e.g., LAN, WAN, VPN, intranet, Internet)?	Yes __	_____
f. Transmit/receive ePHI via an integrated wireless connection (e.g., WiFi, Bluetooth, infrared)?†	No ___	_____
g. Other _____ ?	N/A__	_____

ADMINISTRATIVE SAFEGUARDS	Yes No N/A	Note #
5. Does manufacturer offer operator and technical support training or documentation on device security features?	Yes __	__1__
6. What underlying operating system(s) (including version number) are used by the device?	Windows XP Embedded Service Pack 2	

PHYSICAL SAFEGUARDS	Yes No N/A	Note #
7. Are all device components maintaining ePHI (other than removable media) physically secure (i.e., cannot remove without tools)?	Yes __	_2,3_
8. Does the device have an integral data backup capability (i.e., backup onto removable media such as tape, disk)?	Yes __	__4___
9. Can the device boot from uncontrolled or removable media (i.e., a source other than an internal drive or memory component)?	Yes__	__5___

TECHNICAL SAFEGUARDS	Yes No N/A	Note #
10. Can software or hardware not authorized by the device manufacturer be installed on the device?	No __	_____
11. Can the device be serviced remotely (i.e., maintenance activities performed by service person via network or remote connection)?.	Yes __	_____
a. Can the device restrict remote access to specific devices or network locations (e.g., specific IP addresses)?	Yes __	_____
b. Can the device log provide an audit trail of remote-service activity?	Yes __	_____
c. Can security patches or other software be installed remotely?	Yes__	_____
12. Level of owner/operator service access to device operating system: *Can the device owner/operator_*		
a. Apply device manufacturer-validated security patches?	Yes __	_____
b. Install or update antivirus software?	No __	_____
c. Update virus definitions on manufacturer-installed antivirus software?	N/A__	_6____
d. Obtain administrative privileges (e.g., access operating system or application via local root or admin account)?	Yes __	_____
13. Does the device support user/operator specific ID *and* password?	Yes __	_____
14. Are access sessions terminated after a predetermined length of inactivity (e.g., auto logoff)?	Yes __	_7____
15. Events recorded in device audit log (e.g., user, date/time, action taken): *Can the audit log record*		
a. Login and logout by users/operators?	Yes __	_____
b. Viewing of ePHI?	Yes __	_____
c. Creation, modification or deletion of ePHI?	Yes __	_____
d. Import/export or transmittal/receipt of ePHI?	Yes __	_____
16. Does the device incorporate an emergency access ("break-glass") feature that logs each instance of use?	Yes __	_8____
17. Can the device maintain ePHI (e.g., by internal battery) during power service interruptions?	Yes __	_____
18. Controls when exchanging ePHI with other devices:		
a. Transmitted only via a physically secure connection (e.g., dedicated cable)?	No ___	_____
b. Encrypted prior to transmission via a network or removable media?	No ___	_____
c. Restricted to a fixed list of network addresses (i.e., host-based access control list)?	Yes __	_9____
19. Does the device ensure the integrity of the ePHI data with implicit or explicit error detection/correction technology?	Yes __	_____

†Recommend use of ECRI's Universal Medical Device Nomenclature System (UMDNS).

Manufacturer Disclosure Statement for Medical Device Security – MDS^2

RECOMMENDED SECURITY PRACTICES

Users must take steps to secure their networks and protect their Medical Information Systems which includes a risk assessment strategy, network defense in depth strategy, business continuity planning, etc.

EXPLANATORY NOTES *(from questions 1 – 19):*
IMPORTANT: Refer to Instructions for the Manufacturers Disclosure Statement for Medical Device Security for the proper interpretation of information provided in this form.

1. Carestream Health provides operator and technical training for the DirectView DRX systems. Service/technical documentation includes configuration guidelines for a certified service provider to configure the DR system activation of the software firewall services.
2. Valid Digital Certificate is required for service access (e.g. system modification, loading additional software, use of CD/DVD or USB drives etc.
3. The Clinical user does not have access to the system desktop, limiting access to the Windows Operating System.
4. DR systems have the capability to complete a backup of configuration data via removable media.
5. DR systems have boot capability via the CD/DVD drive.
6. The product does not include Anti-Virus software. Cisco Security Agent is included in the product.
7. The auto logout feature is provided but can be disabled by the local security administrator.
8. The customer has the option of creating an emergency access user account. This is accomplished by creating a user account and safeguarding the password such that it can be used for emergency situations.
9. The system limits transfer of ePHI through defined DICOM associations, which requires defined IP addresses and AE titles.
