Carestream

DRX-Transportable System/Lite

Wireless Tablet Control.

SMART IMAGING SOLUTIONS

Upgrade to Affordable DR with an All-In-One Solution.

Looking to upgrade your analog X-ray room or mobile unit to DR? Now you can – quickly, easily, and economically – with the CARESTREAM DRX-Transportable System/Lite.

The system's rugged tablet eliminates the need for bulky electronics or a fixed console – and displays images right away once acquired. Plus, its beam-sensing technology means the system requires no additional modifications or external connections.

More importantly, the DRX-Transportable System/Lite provides the most important benefits of DR imaging in a single, versatile unit, giving you the freedom to move from room to mobile, letting you capture high-quality diagnostic images wherever you need them most.

Advantages At a Glance

- Quick and easy installation. Beam-sensing technology eliminates the need for external components, cables, or system modifications.
- Instantly converts existing analog rooms and mobiles to DR.
- Easily moves between rooms and mobiles to capture high-quality images throughout your facility.
- Revitalizes and extends the life of your existing image systems for maximum ROI.
- Retrofits multiple systems to optimize cost efficiency.

DRX-Transportable System/Lite

The Power of DR Imaging, Easier and More Portable Than Ever.

Carestream's DRX-Transportable System/Lite offers a smooth, affordable transition to digital radiography with minimal hardware changes, letting you maximize the value of your existing equipment. This effortless transition offers you all the benefits of DR with pristine image quality to boost diagnostic confidence as well as improved workflow efficiency and productivity.

On the Move.

The fully rugged tablet delivers the durability needed to withstand the rigors of daily operations in demanding healthcare environments.

Streamlined Workflow

Eliminate processing delays, making images immediately available for review and transfer to PACS.

Versatility

Wireless design lets you move seamlessly between rooms and mobiles to capture high-quality diagnostic images wherever you need them most.

Increase Return on Investment

Revitalizes and extends the life of existing imaging systems by instantly upgrading them to DR.

Cost Efficiency

Retrofit multiple systems with a single solution to help maximize the value of your existing equipment.

Imaging Software Powered by Eclipse

Eclipse: Harness the Power of Decades of Innovation.

Carestream's Eclipse is the engine behind our innovative imaging software. It uses AI technology and proprietary algorithms to significantly increase the value of the entire imaging chain, from capture to diagnosis.

X-Factor Thinking.

The X-Factor makes the most of your capital spending with configurable, modular components powered by the portable DRX-Transportable System/Lite and DRX Detectors. The X-Factor lets you scale your solution to fit your workflow and budget.

Key Features

- Rugged, IP65 rating, 4 ft drop test.
- Large, 14 ft high-resolution touchscreen.
- Powerful Intel Core i7 processor.
- Dual battery design for extended battery life.
- Built-in handle served as carry handle or kickstand.
- Mounting and docking options available.
- Compatible with a wide range of Carestream detectors (sold separately).

Meet Our Family of DR Detectors.

Our portfolio of DR detectors includes wireless, shareable, glass-free and fixed models to meet your demands based on exam type, detector size, dosage level and budget. Discover the right detector at carestream.com/detectors.
