Carestream

DRX-Transportable System/Flex

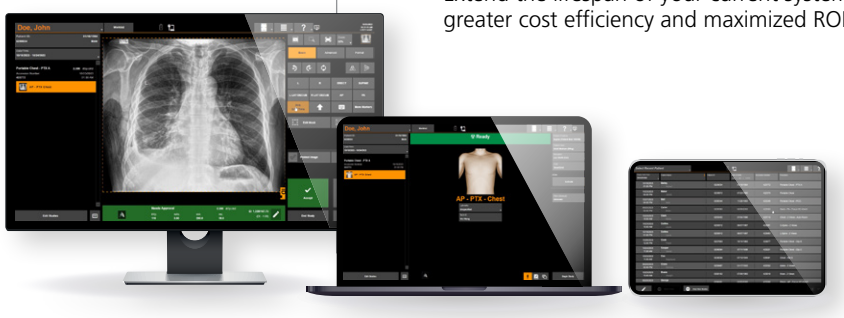
Modern. Digital. Flexible.

SMART IMAGING SOLUTIONS

Upgrade to DR on your terms

Greater flexibility, enhanced image quality, and faster workflows that drive better performance. The CARESTREAM DRX-Transportable System/Flex delivers all three by retrofitting your existing system and unlocking the advantages of DR with the PC that works best for you.

No more hardware constraints. With Flex, your team can extend the lifespan of your current equipment and realize the full advantages of digital radiography using the PC, laptop or tablet that best fit your needs. It's all the performance and seamless integration you've come to expect from the DRX-Transportable family of retrofit systems — delivered in the configuration that works for you.



Advantages At a Glance

- Flexibility to choose preferred PC
- Versatility to retrofit your x-ray rooms and mobiles
- Fast, easy installation with minimal disruption to operations
- Delivers improved digital workflow and exceptional image quality
- Extend the lifespan of your current system for greater cost efficiency and maximized ROI.

DRX-Transportable System/Flex

Greater Flexibility

Expand your options for accessing Carestream's advanced digital imaging. The DRX-Transportable System/Flex gives you the flexibility to leverage the PC you already have or choose a new one that best fits your workflow, making it easier than ever to experience the full benefits of DR.

- **Choose the PC, laptop, or tablet** that best meets your facility's unique needs and IT recommendations.
- **Utilize existing hardware** to avoid costly upgrades and maximize current investments
- **Streamline integration** by eliminating PC-specific barriers, which helps reduce IT objections and enable faster, smoother implementation

A Cost-Effective Path to Digital

The DRX-Transportable System/Flex brings new life to your existing imaging equipment by making retrofitting fast, seamless, and cost-effective. Easily upgrade your X-ray rooms or mobile units to digital and extend the value of your current investment—without major workflow disruption, system modification, or unnecessary capital spending.

Smarter Workflow, Better Care

Leverage the power of digital radiography to eliminate processing delays and accelerate imaging workflow across your facility. With intuitive software designed to streamline every step of the imaging process, the DRX-Transportable System/Flex enhances operational efficiency and supports a higher level of care.

Elevated Imaging Quality Made Simple

Unlock the power of advanced image processing, powered by AI and proprietary algorithms, that delivers consistent, high-quality images to enhance diagnostic confidence. With a range of high-quality wireless detectors and sizes available, you can choose the configuration that best supports your clinical and operational needs.

Key DRX-Transportable System/Flex Features

- Intuitive ImageView software streamlines workflows
- Advanced image processing powered by AI and proprietary algorithms delivers superb image quality
- Compatible with your preferred PC, laptop, or tablet to match your workflow and IT requirements
- Efficiently retrofit existing rooms or mobiles to extend the value of your current investment
- Beam-sensing technology eliminates the need for external components, cables, or X-ray system modifications
- Laptop or tablet configuration offers the freedom to move between systems and retrofit multiple rooms with a single solution
- A range of high-quality wireless detectors and sizes to meet your operational and clinical needs

Meet Our Family of DR Detectors.
Our portfolio of DR detectors includes wireless, shareable, and glass-free models to meet your demands based on exam type, detector size, dosage level, and budget. Discover the right detector at carestream.com/detectors.

Ready to see it in action?

Contact our team and let's talk about how the DRX-Transportable System/Flex can streamline and enhance your radiography operations.
