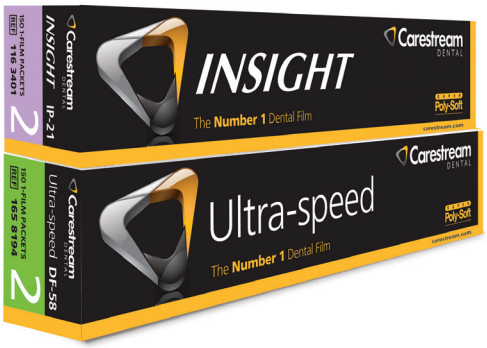
Carestream DENTAL

READYMATIC / READYPRO

Carestream Dental film and chemicals: the perfect combination

READYMATIC and READYPRO dental chemicals have been specially developed for use with INSIGHT and Ultra-speed dental films. The result: consistently high resolution images.



When our dental chemicals are used to process our dental film, you'll get:

- Outstanding image quality for accurate diagnosis
- Superior clarity and resolution
- Compatibility with all leading dental film processors
- Simplified workflow – ready-to-use formulas mean no starter solution, mixing or dilution

Superb Results with Minimal Hassle

READYMATIC dental chemicals

READYMATIC dental chemicals are designed for use in all automatic roller-transport dental x-ray film processors. They deliver clear, consistent results for all intraoral and extraoral radiographs. Plus, they:

- Provide excellent film transportability and sensitometry
- Are specifically formulated to limit residue on rollers and in tanks
- Will keep for up to two years, unopened and stored between 5–30 °C (40–85 °F)
- Are available in convenient chem packs or as separate solutions

READYPRO Twin Pack

READYPRO developer and fixer are specially formulated to keep rollerless processors running. Plus, they:

- Come packaged in pre-measured bottles; all you have to do is open and pour
- Will keep for up to two years, unopened and stored between 5–30 °C (40–85 °F)
- Are available in handy twin packs

Other Carestream Dental Chemicals

Ask us about our wide variety of other chemistry products including X-OMAT chemicals for large automatic processors, Rapid Access dental chemicals for quick access to images and GBX chemicals for manual processing.
